WORK EXPERIENCE

SOFTWARE DEVELOPER | Prosper IT Consulting – Portland, OR   6/22 – 8/22

Under Prosper IT, I had an intensive 2-month long internship. Utilized Sprints, Scrum methodologies, Azure to complete projects.
Here are some examples, listed below:

- Developed a logistical dashboard for Vertigo Theater using ASP.Net MVC & Razor under the direction of staff and with other interns within a 2-week sprint. I personally developed CRUD for actor and staff profiles. Allowing Vertigo theater to easily display relevant frontend/backend information(actor bios, rented equipment, pay, certifications) across multiple views. Utilized Azure, Git, version control.
- Developed a Local Community Sports Application Portal using CRUD Entity Framework Code-First in Django. Served local coaches by facilitating student/coach signup, team rosters, and reserving local field practice times through government park websites utilizing Beautiful Soup.
- Developed a mock Bank Member Application Portal Using Python and Django, developed software to manage a bank member's spending. This included user accounts, expense tracking, memos, and email reminders for balances below $100 by utilizing Celery.
